Introduction:

Christian W. Blaser, Architektur Dialoge

Moderation: Judit Solt, Chief Editor TEC21

Language: English

After a keynote lecture by Nicolas Moreau and Hiroko Kusunoki, internationally acclaimed for their subtle and socially engaged architecture, the discussion will open up questions of reuse, transformation and responsibility.

How do contemporary architects approach the renewal of iconic structures such as the *Centre Pompidou 2030*? What does it mean to build anew in an age of repair?

The panel will bring together voices from France, Japan, Switzerland and Germany to reflect on the future of architecture through transformation.
